2328 Heat Units
to Black Layer

- Excellent performance across soil types and yield environments
- Very good stalks and roots
- Very good staygreen and late season intactness
- Great ear flex with girthy ears
- Superb silage quality and tonnage

An easy choice for growers in 93-96 RM corn country. Handles tough and variable soils well and also has the yield punch to hang with racehorse varieties. Also does well in lower populations due to great ear flex. This hybrid is also a tremendous silage variety when considering quality as well as tonnage.

Pilgrim Brand Hybrids

Plant Height.....	Medium-Tall
Ear Placement.....	Medium
Silage Appeal.....	Excellent
Cob Color.....	Red
Ear Type.....	Flex
Optimum Planting Population.....	26-34,000 ppa
Grain Quality.....	Great
Regional Adaptations	
West.....	Excellent
Central.....	Excellent
East.....	Excellent
