

EMS 7700 Brand

77 R.M.

1870 Heat Units to Black Layer

- Excellent yields for maturity
- Unbelievable plant health from start to finish
- Tall enough for an ultra-early silage
- Great husk flare, dries down well
- This hybrid has been noted for great harvestability

Flowers and black layers ultra-early, which allows adaptation to the northern most corn zones. Early black-layering gives great yield to moisture ratios. Position in stressed areas and expect to see above average yields.

EMS Brand Hybrids

Plant Height.....Medium-Tall
 Ear Placement.....Medium-High
 Silage Appeal.....Good
 Cob Color.....Red
 Ear Type.....Semi-Flex
 Kernel Rows.....14-16
 Optimum Planting Population.....28-32,000 ppa
 Grain Quality.....Good
Regional Adaptations
 West.....Great
 Central.....Excellent
 East.....Excellent
