

EMS 9315 Brand

93 R.M.

2202 Heat Units  
to Black Layer

- Excellent yield performance across soil types and environments
- Great stress tolerance paired with high top end yield
- Has shown some very good silage characteristics for quality and tonnage

A rock solid hybrid for that 90-95 day zone. Unmatched agronomics paired with great yields make this an excellent hybrid when placed in zone. An erect leaf structure makes this a good hybrid for higher populations. A great fit for farms with variable soils.
